DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Claims 1-16

Specifically, claims 1-16 are allowed over the prior art of Popovic' et al., US 5,645,781.

The patent issued to Popovic' et al., teaches a method for the preparation of a fibrous monolithic ceramic, but fails to teach the limitations of a composite comprising at least one layer of a fibrous monolith material and at least one monolithic substrate as set forth in independent claims 1-3 and 16. As set forth in Applicant's specification, the term "fibrous monolithic composite" is defined as a ceramic and/or metallic composite material that includes a plurality of monolithic fibers, or filaments, each having at least a cell phase surrounded by a boundary phase but may include more than one core and/or shell phase. The patent issued to Popovic' et al., teaches the preparation of a single fibrous monolithic ceramic made from green monofilament fibers having a controlled texture, but fails to teach or fairly suggest at least two layers of fibrous monolithic materials wherein each layer is comprised of multiple cell phase comprised of different materials and boundary phase sections having distinct and different orientations as set forth in independent claims 4 and 5. Presently, there is no motivation to combine references to form an obvious type rejection. Thus, claims 1-16 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
